Level: Leadership

Mileposts Standardization - A District Plan
Brady Dickinson, Twin Falls SD
The Twin Falls School District is implementing a model for standardizing the use and expectations of Mileposts throughout the district at all levels. This model was designed by educators and administrators to promote the integration of Mileposts across the district. This session is open to all users, but is geared to administrators and will be helpful for newer Mileposts districts.

Summit

Bring Your Own Device

8:30am - 11:15am
Level: New Users

Beginning Mileposts Training
Marilyn Rountree, Silverback Staff
Learn how to navigate the Mileposts Platform, and how to find a student's e-file quickly from the Home Page. Identify the pathway to various state and district assessments embedded in Mileposts, then sort and analyze assessment data to define student needs. Once the needs are defined, set up individual or group interventions with intentional strategies, find and assign content specific to those needs, and build a graph to monitor the student progress toward goals. Hands-on.

Assessment in Gooru
Gina Morris & Wendy Noble, Gooru
Gooru has the capability for teachers to create formative and summative student assessments using educator-created questions and 9 different item types, and it provides data and analytics on those assessments in the form of student scores and student responses. Assessment items can also be tagged to standards, Depth of Knowledge and 21st Century Skills. Join us and learn how to create a variety of checks for understanding and provide real-time intervention to your students! Hands-on.

Mileposts Lab - You Ask We Answer!

Lacee Peterson, Blaine County SD 61, Silverback Staff
Bring your questions! This will be a customized workshop based on the needs of regular Mileposts users. At the beginning of the workshop, you will have the opportunity to share two topics within Mileposts that you want to learn more about, or how to complete a task in Mileposts more efficiently. From there, the workshop will be designed based on the requests of those in attendance so that we can personally guide you through how to efficiently utilize the Mileposts program. Your Voice Counts, and we can't wait to hear from you! Hands-on workshop.

Progress Monitoring Graphs, Tell the Story of Student Achievement
Cindy Braun, Twin Falls SD 411
Effective, applicable, and regular progress monitoring is essential for determining the success level of an intervention. There are many decisions that must be made when we "Add a Graph". What is your goal? What is your baseline information? What intervention are you going to offer? Who will gather the data? And more importantly, how will you respond to how the student is responding to their intervention? See our system-wide approach to managing progress monitoring. While this presentation will be tailored towards elementary, secondary users may gain valuable information by attending the session.

IDLA - The Future is Now

Cottonwoods

Dr. Sherawn Reberry, IDLA
Attendees in this session will learn what attributes of blended learning really make a difference. Participants will also learn how they can create a blended classroom right now through the application of blended learning models, technologies, and teaching techniques. The session will include an overview, demonstration, and application of each component to help equip each attendee with ideas they can use to begin transforming their classrooms. Attendees in this session are encouraged to bring their own device and headphones to the session so they can participate in the hands-on application of strategies used.

Interventions and Progress Monitoring: The thread that holds Mileposts together

Lacee Peterson, Silverback Staff
A workshop designed to show you how to document interventions within identified tiers to illustrate differentiated instruction and how to utilize the progress monitoring tool to assess the progress being made within interventions. When interventions are documented in a student's e-file, it then gives all teachers that share the student the opportunity to become aware of ways to enrich the student's learning within all classrooms. The progress monitoring tool has many features such as: adding change lines, trend lines, goal lines, daily goal analysis, tying individual progress monitors to customized interventions, and much more! Hands-on workshop!

Panel: What Works!

Mileposts District Leaders
Back by popular demand! Here is your opportunity to learn how other districts have integrated Mileposts into their districts, which have ultimately led to improved student learning. You will also have a chance to ask questions related to implementing with staff, setting expectations, and how these districts follow up on those expectations. Mileposts is the catalyst to improved student learning by providing the critical data to drive instruction at the classroom level. This data becomes the topic of conversation, which leads to change. At the end of the panel, **a $100 Amazon Gift Card** will be given to one lucky attendee. You must be at the panel discussion to win.

Panel: Teaching with Mileposts

Mileposts District Leaders
This is a teacher-centered panel and discussion group. Panelists are teachers, departments leaders, and regular users of the Mileposts program. Join them and ask how they make Mileposts part of their daily practice? Why do they believe in the use of Mileposts? How did they ever find the time to document in Mileposts? What are the tips and tricks that they have to inspire your practice in the upcoming school year? At the end of the panel, **a $100 Amazon Gift Card** will be given to one lucky attendee. You must be at the panel discussion to win.
